

Himanshi Sharma

Web Designer

I'm a web designer with 2 years of experience, focused on creating clean, user-friendly designs. I'm always looking to grow and improve my skills, which is why I'm learning React.js and gaining hands-on experience with it. I'm passionate about design and love taking on new challenges to push my creativity and technical abilities further. My goal is to keep evolving in the design field and contribute to innovative web experiences.

EXPERIENCE

<https://ahitechno.com/>

AHITechno work as Web Designer

As the web designer for AHITechno, I was responsible for designing a user-friendly, responsive website that showcases their IT services and digital marketing solutions. I worked on creating an intuitive user experience, making sure the site looked great across all devices, and aligned with their brand. The goal was to boost their online presence and support their marketing efforts with a professional, user-friendly site.

<https://a2groups.org/>

A2Groups work as Web Designer

As the web designer for A2Groups, I worked on creating a simple, professional website using React JS that brings together their different ventures in one place. My goal was to design a clear and easy-to-use layout, making it simple for visitors to find what they need while keeping the site visually appealing. The focus was on delivering a smooth user experience and representing the brand in a way that felt cohesive and professional across all sections.

<https://www.ahecounselling.com/>

AHECounselling work as Web Designer

As the web designer for AHECounselling, I focused on developing a visually appealing and functional website that enhances user experience. Leveraging CSS, HTML, Bootstrap, and JavaScript, I crafted a responsive layout that not only looks professional but also ensures easy navigation. The goal was to highlight their writing services while making the site accessible and engaging for visitors.

<https://bbsmituni.com/>

BBSMIT work as Web Designer

As the web designer for BBSMIT, I developed a website for their coaching programs in IT (Java, Node.js, graphic design, web design), digital marketing, IELTS, languages, and more. Using HTML and CSS, I created an easy-to-navigate site with clear icons and a simple layout, ensuring students can quickly find information and access various courses to gain real-world experience.

<https://restaurant-opal-ten.vercel.app/>

Restaurant Website

For this project, I created a restaurant website as a sample to practice React.js. The design focuses on providing a smooth, offline-like navigation experience, making it easy for users to explore the restaurant's menu and details just as they would in person.

EDUCATION

MBA in IT & HR
Management (Distance
Learning)

Suresh Gyan Vihar University,
