PROFILE

I'm a web designer with 2+ years of experience, focused on creating clean, user-friendly designs. I'm always looking to grow and improve my skills, which is why I'm learning React.js and gaining hands-on experience with it. I'm passionate about design and love taking on new challenges to push my creativity and technical abilities further. My goal is to keep evolving in the design field and contribute to innovative web experiences.

EXPERIENCE

AHITechno work as Web Designer

- Tailored and designed a user-friendly website for AHIT using HTML, CSS, JavaScript, Bootstrap, and PHP for backend functionality.
- Developed responsive layouts to ensure seamless access across a range of devices and screen sizes.
- Collaborated with the AHIT team to align the website with their branding and vision for the IT sector.
- Integrated interactive elements, including forms and animations, to enhance user engagement.
- Optimized website performance by minimizing load times and improving speed across all platforms.

A2Groups work as Web Designer

- Designed and developed A2Groups' website with React.js and CSS to ensure a responsive and user-friendly interface.
- Created an intuitive design that effectively showcased the company's key achievements and services.
- Optimized website performance for faster loading times and seamless cross-browser compatibility.
- Ensured the design aligned with the company's vision of innovation and growth in diverse industries.

AHECounselling work as Web Designer

- Designed and developed a user-friendly website for AHEC using HTML, CSS, Bootstrap, and JavaScript, aligning with the company's academic counseling and writing services.
- Ensured the website reflected AHEC's brand identity, providing students with personalized guidance in academic and writing support.
- Created an intuitive navigation system, enhancing user accessibility and improving overall site usability.
- Collaborated with content teams to ensure the website effectively communicated AHEC's mission and services to a global audience.
- Regularly tested and refined the website to ensure optimal performance and smooth user experience across all devices.

BBSMIT work as Web Designer

- Crafted a user-friendly website for BBSMIT using HTML, CSS, ensuring it reflected the institution's professional goals.
- Created intuitive layouts that prioritized accessibility and streamlined navigation for all users.
- Collaborated with BBSMIT to ensure the website matched their branding and educational objectives.
- Integrated interactive elements to engage users and provide a dynamic browsing experience.
- Conducted testing and optimization to ensure fast load times and smooth performance across devices.

PERSONAL PROJECTS

Restaurant Website

- Built a user-friendly restaurant management sample website using React.js and Material UI, ensuring seamless functionality.
- Built responsive layouts for both desktop and mobile users, ensuring compatibility across devices.
- Integrated interactive elements such as booking forms and menus to enhance user engagement.

Ayodhya Hotels & Homestays

- Developed a user-friendly website for Ayodhya Hotels & Homestays using Next.js and CSS.
- Focused on crafting a responsive design that enhanced the booking experience for users.
- Applied performance optimization techniques for faster loading and improved user engagement.
- Contributed to delivering a polished website that showcased the best of Ayodhya's hotels and homestays.
